My First Hello World	16

New to the Servlet Container (aka., Java Web Server)

Before developing Web applications in Java (and running ZK demo in your machine), you have to install a Servlet container first. Apache Tomcat is one of the most popular Servlet containers. It is easy to install and use.

Prerequisites	Description	
Download	Installer for Windows:apache-tomcat-5.5.20.exe	
	A list of all available versions: http://tomcat.apache.org/download-55.cgi	
Documentation	http://tomcat.apache.org/tomcat-5.5-doc/index.html	

New to Java Language

You don't need to know Java to use ZK, since all rich user interface can be implemented in HTML-like markup language called ZUML. However, to complete a Web application, you or teammate need some basic knowledge about Java. Here are some good tutorial.

Java	URLs
Language Basic	http://java.sun.com/docs/books/tutorial/java/nutsandbolts/index.html
Class and Object	http://java.sun.com/docs/books/tutorial/java/concepts/index.html
	http://java.sun.com/docs/books/tutorial/java/javaOO/index.html
	http://java.sun.com/docs/books/tutorial/java/IandI/index.html

New to Java Integrated Development Environment (IDE)

Eclipse is one of the most popular Java IDEs. With IDE, it is easier to develop and debug your Web applications. Moreover, you can understand ZK better by debugging through ZK's source codes.

The step-by-step setup guide can be found in one of our small talks:

http://www.zkoss.org/smalltalks/eclipse/ek.html

ZK: Quick Start Guide Page 4 of 16 Potix Corporation

1. What to Download

Download ZK Library:

http://www.zkoss.org/download/zk.dsp

File	Description
zk-bin-std-3.6.0.tar.gz	The binary distribution of ZK with the minimal set of
zk-bin-std-3.6.0.zip	libraries that you need to enrich your Web applications with ZK.
	It is also called the standard edition.
zk-bin-prof-3.6.0.tar.gz	The binary distribution of ZK, including the standard
zk-bin-prof-3.6.0.zip	edition, JFreeChart, Google Maps, Jasper Reports, and layout components.
	It is also called the professional edition.
zk-bin-3.6.0.tar.gz	The binary distribution of ZK, including the professional
zk-bin-3.6.0.zip	edition, accessibility, the performance version of ZUL (zkmax.jar), and versatile plug-ins, such as Ruby, Groovy, JavaScript, MVEL and OGNL.
	It is also called the enterprise edition.
zk-demo-3.6.0.zip	Standalone $z k demo$ application in WAR and EAR format, and the source codes of $z k demo$.
	It is the fastest way to test drive the features of ZK without configuring your Web server.
zk-javadoc-3.6.0.zip	The Java API document of ZK framework.
zk-src-3.6.0.tar.gz	The source codes of ZK framework.

ZK: Quick Start Guide Page 5 of 16 Potix Corporation

2. Run the Demo

The simplest way to test drive the power of ZK is to visit http://www.zkoss.org/zkdemo/userguide.

If you want to run the demo in your local server, you can follow the following steps.

- 1. Download zk-demo-3.6.0.zip from here (sourceforge.net).
- 2. After uncompressing the file, you can deploy <code>zkdemo.war</code> or <code>zkdemo.ear</code> to your Web or application server.

For Tomcat server, you can copy it directly to the \$TOMCAT_DIR/webapps directory, and then Tomcat will start the deployment automatically.

3. After zkdemo.war is deployed you can visit it at, say, http://localhost:8080/zkdemo/userguide. The port number depends on how you installed your Web or application servers. Some application servers deploy only the EAR file. That is, you have to deploy zkdemos.ear instead.

ZK: Quick Start Guide Page 6 of 16 Potix Corporation

3. Begin Your First ZK Project

ZK consists of several libraries (the JAR files). There are two alternatives to install them.

First, you can bundle them with your Web application. In other words, copy them to the WEB-INF/lib directory of your Web application. The benefit is that you can deploy your Web application to any Web server without configuring the Web server.

Second, you can install them to your Web or application server. In other words, copy them to your Web application directory (for Tomcat, it is \$TOMCAT_HOME/webapps/\$PROJECT_NAME/WEB-INF/lib).

1. Download ZK Library:

http://www.zkoss.org/download/zk.dsp

2. Create project

Create a development directory under \$TOMCAT_HOME/webapps.
The structure of development directory is shown below:(ex.zkdemo)

```
+zkdemo
+WEB-INF
web.xml
index.zul
```

3. Unzip ZK library

Unzip zk-bin-prof-xxx.zip or zk-bin-prof-xxx.tar.gz (ex. zk-bin-prof-x.x.x.zip)

4. **Deploy ZK library**

Copy the following jar files to the \$TOMCAT_HOME/webapps/\$PROJECT_NAME/WEB-INF/lib (ex.zkdemo/WEB-INF/lib)

```
dist/lib/*.jar
dist/lib/zkforge/*.jar
dist/lib/ext/*.jar
```

5. Create web.xml

Create web.xml under \$TOMCAT_HOME/webapps/zkdemo, and Copy the following lines into web.xml

```
<!-- ZK -->
```

```
stener>
  <description>Used to clean up when a session is destroyed</description>
  <display-name>ZK Session Cleaner</display-name>
  tener-class>org.zkoss.zk.ui.http.HttpSessionListener/listener-class>
</listener>
<servlet>
  <description>ZK loader for ZUML pages</description>
  <servlet-name>zkLoader</servlet-name>
  <servlet-class>org.zkoss.zk.ui.http.DHtmlLayoutServlet</servlet-class>
    <param-name>update-uri</param-name>
    <param-value>/zkau</param-value>
  </init-param>
  <load-on-startup>1</load-on-startup>
</servlet>
<servlet-mapping>
  <servlet-name>zkLoader</servlet-name>
  <url-pattern>*.zul</url-pattern>
</servlet-mapping>
<servlet-mapping>
  <servlet-name>zkLoader</servlet-name>
  <url-pattern>*.zhtml</url-pattern>
</servlet-mapping>
<servlet>
  <description>The asynchronous update engine for ZK</description>
  <servlet-name>auEngine/servlet-name>
  <servlet-class>org.zkoss.zk.au.http.DHtmlUpdateServlet</servlet-class>
</servlet>
<servlet-mapping>
  <servlet-name>auEngine</servlet-name>
  <url-pattern>/zkau/*</url-pattern>
</servlet-mapping>
```

6. Create first ZUL File

Create index.zul under \$TOMCAT_HOME/webapps/zkdemo/, and copy the following lines into it.

7. Start Tomcat

Execute \$TOMCAT_HOME/bin/start.bat to activate Tomcat. (ex. C:\Program Files\apache-tomcat-5.5.23\bin\start.bat)

8	E	Browse zkdemo Browse to http://localhost/zkdemo/configuration for Tomcat.	or	http://localhost:8080/zkdemo/	depending	on	your

4. The Content of Binary Distribution

This chapter describes the content of zk-bin-3.6.0.zip.

/doc

This directory holds the documents including copyrights and release notes.

/dist/lib

This directory holds the binary libraries required to run ZK.

/dist/lib/zkforge

This directory holds the components from ZK Forge, such as FCKeditor. It is optional depending on whether you need them.

File	Description
fckez.jar	Required if you want to use ZK FCKeditor components.
	Version: 2.6.1_1
gmapsz.jar	Required if you want to use ZK Google Maps components.
	Version: 2.0_8
timelinez.jar	Required if you want to use ZK Timeline components.
	Version: 1.2_1

/dist/lib/ext

This directory holds the external libraries required to run ZK. Since these libraries are common, you might have installed them in your container.

Here are optional jar files. You can choose whether to copy depending on your requirements.

File	Description
commons-fileupload.jar commons-io.jar	Required if you want to upload files with them.
	Version: Commons Fileupload 1.2.1 and Commons IO 1.3.1
jcommon.jar	Required if you want to use ZUL's chart component.

ZK: Quick Start Guide Page 10 of 16 Potix Corporation

File	Description
jfreechar.jar	Version: JFreeChart 1.0.10 and JCommon 1.0.13
	[not available in the standard edition]
<pre>jasperreports.jar itext.jar</pre>	Required if you want to use the jasperreport component.
jxl.jar	Version: Jasper Reports 3.0.0
<pre>poi.jar commons-collections.jar commons-logging.jar</pre>	(itext: 2.1.3, commons-collections: 2.1, commons-logging: 1.0.2, jxl: 2.6.8, poi: 3.0.1)
	Note: poi.jar is required if you want to use Apache POI to
	generate Microsoft Excel format. And, jxl.jar is required
	only if you want to use JExcelApi to generate the Microsoft
	Excel format.
	[not available in the standard edition]
bsh.jar	Required if you want scripting in Java interpreter (BeanShell).
	Version: BeanShell 2.0b4
js.jar	Required if you want scripting in JavaScript (Rhino).
	Version: Rhino 1.7R1
	[not available in the standard and professional edition]
groovy.jar	Required if you want scripting in Groovy.
	Version: Groovy 1.5.6 (groovy-all)
	[not available in the standard and professional edition]
jruby.jar	Required if you want scripting in Ruby (JRuby).
	Version: JRuby 1.1.2 (jruby-complete)
	[not available in the standard and professional edition]
jython.jar	Required if you want scripting in Python (Jython).
	Version: Jython 2.2.1
	[not available in the standard and professional edition]
Filters.jar	Required if you want to use the captcha component.
	Version: JH Labs Java Image Filters
	[not available in the standard edition]

File	Description
mvel.jar	Required if you want to use MVEL to evaluate the expressions.
	Version: MVEL 1.2.21 (for Java 1.4 or above)
	[not available in the standard and professional edition]
ognl.jar	Required if you want to use OGNL to evaluate the expressions.
	Version: OGNL 2.6.9
	[not available in the standard and professional edition]

/dist/src

This directory holds the source codes in JAR format. These JAR files are used for debugging in IDE, such as Eclipse. You cannot build the binary libraries from these. Rather, download and uncompress zk-src-3.6.0.tar.gz.

/dist/xsd

This directory holds the XSD files that might be useful to develop ZK applications.

/dist/WEB-INF

This directory holds the TLD files. These TLD files are part of JAR files so they are loaded automatically. We put them here mainly for your reference only.

5. The Content of Demo Distribution

This chapter describes the content of zk-demo-3.6.0.zip.

/

This directory holds the executable: zkdemo.war, zkdemo-min.war, zkdemos.ear and zkdemos-min.ear. Refer to the **Installation** chapter for details.

/zkdemo

This directory holds the source codes of the live demo.

/MyApp

This directory holds an empty Web application which you can start your new Web application from.

6. My First ZK Application

Prepare WEB-INF/web.xml

Copy or merge the following content to the <code>web.xml</code> in the WEB-INF directory in your application. This step must be done once each time you created a new Web applications. Then, what you need to do is to copy files with .zul or .zhtml extension to the proper directories in your Web applications.

```
<web-app version="2.4" xmlns="http://java.sun.com/xml/ns/j2ee"</pre>

```

My First Hello World

Create a file called hello.zul with the following content. Then, you could use the browser to see the result, say http://localhost:8080/zkdemo/hello.zul.

```
<window title="My First window" border="normal" width="200px">
    Hello, World!
</window>
```

Then, the result is depicted as follow.

My First window Hello, World!

Notice that, though the content of hello.zul is very similar to XUL¹, it is actually written in ZUML. ZK Loader parses it into a valid HTML page which can be interpreted correctly by a regular browser, such as Internet Explorer and Mozilla Firefox. Refer to the Developer's Guide for more details.

¹ http://xul.sourceforge.net/mozilla.html
